Following the inclusion of Lead metal (Pb) on the most recent update of the ECHA Candidate List of SVHC, and in accordance with REACH Regulations: Article 33, PEGLER is now required to inform you that this substance is present in the brass and gunmetal items provided to you, in concentrations above 0.1% by weight.

Advice on the safe use of these items has not changed: when applications bring them into contact with water intended for human consumption it is the obligation of the installer to check that they hold the appropriate national approval.

At the end of the items life it should be recycled.
