

Policy Statement

Pegler Yorkshire Commitment to Efficient Energy Usage

Pegler Yorkshire Group Ltd undertakes to operate all of its activities in an energy conscious manner in order to minimise energy usage and therefore impact on the environment.

All employees of Pegler Yorkshire are also responsible in minimising energy usage and will be trained and encouraged to do so.

We will as a business commit to:

- Reducing energy consumption in all global operations and therefore our impact on the environment.
- Constantly monitoring our energy consumption with a view to identifying all reduction opportunities.
- Conducting an annual review at which targets and objectives will be set for the coming year and beyond if necessary and introduce management programs in order to achieve these.
- Publishing measures within the business to indicate our energy reduction progress in the form of a carbon footprint declaration and kWh consumed per tonne of product produced.
- Ensure energy efficiency is a major consideration in all aspects of management decision making and purchasing.
- Nominate an energy champion within each element of the business to ensure this policy is implemented effectively.
- Ensure sufficient financial and organisational resources are provided to meet the commitments set out in this policy statement.

Our goals are simple; we will strive to reduce relative energy consumption within all aspects of our operations, in order to reduce greenhouse gasses, pollution, carbon footprint and our impact on the global environment.

A handwritten signature in black ink, appearing to read "Craig Malloy". The signature is written in a cursive style and is positioned above the printed name and title.
